# DRIR RAIL ALIGNMENT

NWC CAC-September 28, 2017

# DRIR RAIL ALIGNMENT-MASTER PLAN

# DRIR RAIL ALIGNMENT-ALTERNATIVE

# DRIR RAIL ALIGNMENT ALTERNATIVE

Program team is studying ways to more efficiently deliver the construction of the site

## Potential Benefits

- **Maintains the same riverfront space as the Master Plan**
- **Eliminates a 200' long rail bridge**
- **Reduces construction schedule**
- **Takes rail off of critical path-allows the existing rail corridors to remain in place during construction**
- **Allows for the yards implementation to be phased**
- **Potential to provide a better campus for both users and operations**

## Needs More Study

- **Access across the rail to the Riverfront Open Space**
- **Vehicular access to the site from Race Court and Bettie Cram Drive**
- **Rail connections at the south end of the site**
